

## Recommendation Letter

WinSoft.io  
Hello@winsoft.io  
9.04.2025

To Whom It May Concern,

I am pleased to recommend Mytkovets Mikhail for a frontend developer position. Over the past year, he has been an integral part of our team at WinSoft.io, starting as a Junior Frontend Developer and making significant progress in his skills.

During this time, Mikhail contributed to various projects using Vue.js, React, Preact, and Astro.js. He quickly integrated into our workflows, demonstrated a strong understanding of frontend development principles, and played a substantial role in improving the user experience. When facing a lack of experience or knowledge, he learned quickly, independently explored new frameworks and libraries, and applied them successfully in practice. It is especially worth noting that he has a strong tendency to analyze tasks in depth, find effective solutions, and write clean, adaptive, and maintainable code.

I would particularly like to highlight Mikhail's reliability and dedication. Throughout his time with us, he was always available, consistently met deadlines, and never let the team down. He was always responsive and willing to assist when urgent tasks required attention outside regular hours.

I am confident that Mikhail will be a valuable asset to any team and highly recommend him for a frontend development role. Should you require any additional information, please feel free to contact me at **Dmitry.Chudakov@winsoft.io**.

Best regards,  
Dmitry Chudakov
